Public health advisory issued for Lemolo Lake

A health advisory prompted by high algae levels found in Lemolo Lake, located 60 miles from Roseburg, Ore., was issued today by the Oregon Department of Human Services (DHS), the Umpqua National Forest and the Douglas County Health Department.

Water sampling by the Umpqua National Forest has confirmed the presence of blue-green algae that can produce toxins harmful to humans and animals, said Ken Kauffman, Environmental Health Specialist with the Oregon DHS Environmental Toxicology Program.

These levels are likely to be associated with dangerous toxin concentrations in the water, according to World Health Organization guidelines.

Swallowing or inhaling water droplets should be avoided, as well as skin contact with water by humans or animals. Drinking water from Lemolo Lake is especially dangerous. The toxins cannot be removed by boiling, filtering, or treating water.

DHS recommends that people who choose to eat these fish should remove all fat, skin and organs before cooking because toxins are more likely to collect in these tissues.

Symptoms of numbness, tingling and dizziness can lead to difficulty breathing or heart problems and require immediate medical attention. Symptoms of skin irritation, weakness, diarrhea, nausea, cramps and fainting should also receive

medical attention if they persist or worsen. Children and pets are particularly susceptible.

The public will be advised when the concern no longer exists.

With proper precautions to avoid water contact, people are encouraged to visit Lemolo Lake and enjoy activities such as camping, hiking, biking, picnicking, catch-and-release fishing, and bird watching.

For local information contact the Diamond Lake Ranger District office at (541) 498-2531 or (541) 793-3310 weekends, or <http://www.fs.fed.us/r6/umpqua/>. For health information, contact Ken Kauffman, DHS Environmental Health Specialist, at (971) 673-0435 or <http://oregon.gov/DHS/ph/envtox/maadvisories.shtml>. For health information, contact or call Terry Westfall, Douglas County Health and Social Services at (541) 440-3569.
