

2010 PLAIN PAPER SPECIFICATIONS

EMPLOYEE DETAIL REPORT (132 DOMESTIC)

To meet the Employee Detail Report (Form 132 Domestic) format requirements, data must be printed on plain, white 20# bond paper. Do not print any headings, columns, or instructions unless you find them in the specifications below. The print must be clear, black, and distinct. Use a 12 point Courier font. The objective is to create a clear, easily readable entry for our Optical Character Reader (OCR) machine. Testing has shown that reports are read much more accurately if prepared using capital letters rather than changing cases or using lower case. Use CAPITAL LETTERS ONLY.

To verify data is in the correct position, place your printout under a drop out red form. All data should be in the exact order, position, and spacing as found on the Form 132 Domestic.

Line spacing is exactly six vertical lines per inch and column spacing is ten horizontal character positions per inch. For alignment purposes, the top of the page is the top of print line 1; the bottom of the form is the print line 66; the left edge is the left side of the print position 1; and the right edge is the right side of print position 85. Beginning with this alignment, space the Employee Detail Report according to the following specifications:

<u>Item</u>	<u>Line Spacing</u>	<u>Column Positions</u>	<u>Print Formats</u>
Form Title	3	32 – 55	FORM 132 DOMESTIC – 2010
